Chapter 1

Patch 01

Software Requirements

Apply the latest hotfix on the following product:

- AVEVA Work Tasks 2023 SP1 Connector for System Platform version 8.1.2030

Before You Apply Patch

Before running the patch executable file, consider the following:

- Undeploy the Workflow Gateway Object and ViewApps where AvevaWorkTasksApp is used.
- Unprovision the Workflow Gateway Object to the Work Tasks repository.
- Take note of the existing OMI Apps that were previously imported, including the number of apps and their names.

Note: It is recommended to have only one OMI App (AvevaWorkTasksApp).

- Remove all OMI Apps. This will trigger a restart of the System Platform IDE.
- Close the System Platform IDE.

Installation Instructions

Follow the instructions below to apply the patch:

1. Copy the **AWT2023SP1-CON-SYS-PLATFORM-PATCH-8.1.2031** zipped file to the server where AVEVA Work Tasks Connector for System Platform is installed.
2. Extract the files from the zipped file.
3. Run the **AWT2023SP1-CON-SYS-PLATFORM-PATCH-8.1.2031.exe** as an **Administrator**.

4. Browse to the path <ArchestrA Installation Path>\ArchestrA\Workflow\AppObjects and verify whether **WorkflowGateway_91.1.aaPKG** is copied.
If it is not copied, then manually copy it from the extracted folder to the above specified path.
5. Connect to the System Platform IDE and then log on to the required Galaxy.
6. Select **Import > Object(s) > From Package** from the Galaxy menu. The **Import Objects from package** dialog box appears.
7. Browse to the path <ArchestrA Installation Path>\ArchestrA\Workflow\AppObjects, select **WorkflowGateway_91.1.aaPKG**, and then select **Open**.
8. Select **Import > Visualization > OMI App** from the Galaxy menu.
9. Browse to the path <ArchestrA Installation Path>\ArchestrA\Workflow\InTouchOMI, select **AvevaWorkTasksApp**, and then select **Select Folder**.
10. After importing is successful, OMI App appears as AVEVAWorkTasksAppXXX in the Graphic Toolbox. Rename it to the existing OMI App names that were previously imported.
11. Close and reopen the System Platform IDE.
12. Provision the Workflow Gateway Object to the Work Tasks repository.
13. Redeploy the Workflow Gateway Object and ViewApps where AvevaWorkTasksApp is used.

Resolved Issues

Patch 8.1.2031

- The grid data in Fill Form gets emptied in InTouch OMI, which is configured with Web API using User Access Token, when the application is open for more than 1 hour.
- Synchronizing the galaxy security with Work Tasks throws an exception if the data file is larger.

Known Limitations

Not Applicable.
