This Month's Digital Transformation Digest

Happy New Year from Industrial Software Solutions to you and yours!

Here's to a year of seamless automation, where every cog turns perfectly and every output exceeds expectations. May your factories hum with efficiency, your plants flourish, and your success graphs climb higher than ever before.

Thank you for choosing us to be a part of your industrial journey. Wishing you a year filled with streamlined operations, increased productivity, and the sweet symphony of success in every production cycle. Happy 2024!

Pepsi Bottling Plant Decreases Downtime and Achieves Swift Payback

Get ready for a pop of efficiency, Northwest friends! In the heart of our caffeine-infused region, Pepsi Bottling Ventures (PBV) of Idaho has shaken things up with AVEVA's game-changing solutions.

Imagine a bottling plant where changeover time takes a 50% nosedive, and line efficiency skyrockets by 10%. AVEVA's System Platform, MES, and InTouch HMI

are the secret ingredients behind this bubbly transformation, providing PBV with consistent data, eliminating guesswork, and delivering a swift payback in less than a year.

Cheers to Pepsi production's fizzy symphony of success, and our fantastic collaboration with Apex Manufacturing Solutions!

Orange Icon Won't Go Away After Deploying InTouchView App

During deployment of an InTouchView app, it is normal behavior for an orange icon to appear over the InTouchView app instance which indicates that the files and folders are still being copied over to the remote machine.

You may experience an issue where this orange icon does not clear up on its own.

This tech note will provide steps to try and correct this "orange icon" issue by manually unsharing the InTouchViewApp folder.
